

Roshan Thaabith

SOFTWARE DEVELOPER

Intro

Full-stack developer at Founders & Coders, with a background in software testing. I enjoy writing **clean**, concise code, and **building intuitive UI**. I am looking for a front-end/full-stack role in a fast-paced forward-thinking company with a **supportive culture** that values **diversity**, where I can **learn** and grow to be the best web software developer I can be.

Tech stack

- HTML & CSS
- Javascript
- Node.js
- Reactjs
- Express
- Handlebars
- PostgreSQL
- ES6

Skills & Methodologies

- Travis CI
- Test-driven development
- Git & version control
- Tape + Supertest
- Pair Programming
- Linters
- Heroku & Netlify
- Jest
- React Testing Library
- Agile

Meetups

- Node Girls
- Codebar
- Front-end London

Hobbies & Leisures

Foodie

Film

Capoeira

Hiking

Photography

Work Experience

Software Developer | Founders & Coders

Oct 2019 - March 2020

Joy | Quality Assurance Lead

- **Design** and **build** an **efficacy tool** based on UCLA loneliness scale to capture data about people's wellbeing before and after "social prescribing".
- Ensuring TDD and maintaining code quality and test coverage though out the project

Reactjs, Express, React-vis, Material UI, Jest, PostgreSQL, Netlify.

[Repo](#) [View](#)

Reduce, Reuse, Recycle | Scrum Master Lead

- Build an app that teaches kids how to recycle through an Interactive and educational **drag and drop game**.
- Responsible for sprint planning and sorting out tickets based on their priority
- Responsible for leading daily stand-ups, writing concise, achievable user stories and managing the project delivery timeline

Reactjs, Styled Components, Jest, Netlify

[Repo](#) [View](#)

Software Quality Engineer | Apple Inc.

Shazam acquisition | Oct. 2016 - Oct. 2019

- Responsible for running scheduled **manual regressions**.
- Create clear and concise **bug reports**
- Using **proxy tools** to debug the data flows from applications to services.
- Providing robust **ad-hoc** support to multiple engineering departments within the organisation.
- Applying **exploratory** and ad hoc testing to new features coming out.
